

fives

Industry can do it.

Industrial engineering Group

Fives supports leading global industrial players in sectors such as intralogistics, metals (steel, aluminium), cement and minerals, energy (nuclear and combustion), aerospace, defence, and automotive.

Fives builds long-term partnerships with its clients by combining:

- **The design and supply of installations:** machines, process equipment and production lines.
- **A comprehensive service offering** covering the entire lifecycle of installations, helping to use them more optimally.

This long-term relationship is built on deep knowledge of local environments and the expertise of **more than 8,500 employees operating in 25 countries worldwide.**

Two centuries of industry-driven innovation

From the first railway lines to the lifts in the Eiffel Tower and Industry 4.0 factories, Fives has been designing **disruptive solutions and technologies shaping industry** for over **200 years**.

As a pioneer in decarbonisation and digitalisation, Fives is always one step ahead in innovation by **anticipating customer needs**.

Fives brings together **environmental and economic capability** by responding to the specificities of each local market.

At every stage, alongside our customers, with a comprehensive range of services.

Fives supports its customers throughout the entire life cycle of their facilities: **supplying spare parts, auditing, consulting, training, maintenance, optimization, digitalization, modernization, etc.**

Thanks to our dedicated, expert teams located around the world, **we deliver sustainable improvements in the performance, availability, and profitability of industrial systems.**
