

Press Release – Birmingham, Alabama, June 14, 2024

North American Construction Services Completes Expansion

North American Construction Services, LTD.—a leader in furnace engineering, manufacturing, maintenance and construction for the thermal process industry—finished relocating their offices and manufacturing plant from Irondale, Alabama to Birmingham, Alabama. This is in line with Fives group's international strategy to grow and support regional markets.

MAKING THE MOVE

Now located at **4466 Pinson Valley Parkway, Birmingham, AL 35215**, the newly renovated office and fabrication shop are now situated within **85,000+ square feet, more than twice the size of the previous facility**. This allows for additional shop floor space for fabrication, piping, assembly, refractory, and paint, as well as added overhead cranes and jib hoists. The warehouse space for materials stock has been upgraded from 7,200 square feet to **10,500 square feet**. This expansion is a critical

component to growing the capabilities of the company to meet more customer demand.

« North American Construction Services outgrew the old location in Irondale and were looking for a larger facility to offer better services to customers and a more modern work environment for employees. North American Construction Services has improved processes and increased manufacturing capacity and capabilities to better support customers—OEMs, component suppliers, and plant operators, » said Stephan Paech, CEO & President at Fives North American Combustion.

A HISTORY OF PROGRESS

North American Construction Services, part of Fives Group, has been a **trusted provider of services and supplies for thermal process customers since 1975**. Along with their headquarters located in Birmingham, Alabama, North American Construction Services has **two remote facilities located in Winston Salem, North Carolina and Seymore, Indiana**. These service centers cater to customers' maintenance and facility needs in the surrounding areas to help minimize furnace downtime with timely and exceptional customer service.

SUPERIOR MAINTENANCE AND SYSTEM SOLUTIONS

With this exciting new venture, North American Construction Services looks forward to utilizing their new capabilities to continue offering maintenance projects involving repairs of in-place equipment being restored or serviced. The team in Birmingham works directly with Fives North American Combustion's team and the customer to determine the scope of work. Services offered include maintenance, construction, system solutions, materials, and aftermarket services.

WHAT'S NEXT

North American Construction Services plans to **keep innovating and growing**, as they always have.

« What sets us apart from other construction companies are our turnkey solutions, innovative design and engineering, large-scale complete manufacturing, piping and mechanical systems, and refractory design and installation services which have developed long-term committed relationships with customers, all of which are made possible by our dedicated and skilled workforce, » said Matt Owens, General Manager at North American Construction Services.
