

«Beyond» Adaptor

For any type of fluid

Ergonomics, precision and reliability

- Compatible with a wide range of fluids
- Adaptable to most of your filling machines
- Easy to manipulate
- Easy maintenance

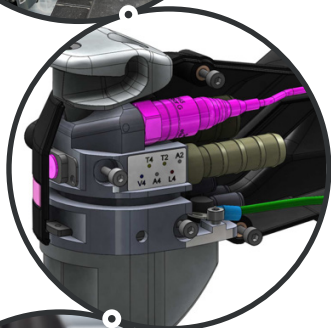

Our Beyond Adaptor can manage any types of fluids.
It ensures ease and comfort of use for operators, while improving
your production performance.

4 reasons to chose the «Beyond» Adaptor:

SIMPLICITY AND ERGONOMICS

Its ajustable handle and forearm support ensure optimal user comfort. Handling is simplified: large, easily accessible buttons for cycle launch and enhanced visibility of progress status thanks to its integrated LED. Its flexible hose and lightness design allow it to adapt to all environments, including Atex zones.

PRECISION AND PERFORMANCE

The optimized design increases filling flow rates and allows for instant and precise measurement of process values (vacuum and pressure), resulting in higher production rates.

RELIABILITY

Our expert teams have redefined the concept of maintenance to reduce downtime and extend the lifespan of components. Data monitoring (RFID chip) allow you to perform maintenance 'at the right time' and in record time (valve replacement in just 1 minute!)

DURABLE AND ENVIRONMENTALLY FRIENDLY

Its anti-drip system helps to keep a clean working environment, and the choice of materials ensures longevity, recyclability and reduces your environmental impact.
