

Complete Sealing Robotic Integration

Dual expertise as a Proprietary Sealing Equipment Supplier and a Complete Solution Integrator

- A recognized know-how based on highly-skilled teams and many references since 1958
- From feasibility studies to commissioning, an extensive expertise in process design, mechanics, automation, robotics and quality control analysis
- DeckerSealing™ product supply, either individually or as complete integrated solutions
- A complete range of services to support customers through the equipment lifecycle
- An international network for local fast response

A comprehensive expertise to meet all project needs in Sealing applications

IN-HOUSE MULTI-DISCIPLINE ENGINEERING EXPERTISE

- Preliminary studies and feasibility analysis
- Proprietary product design and assembly
- Quality control analysis:
 - 2D and 3D vision systems
 - Laser sensor integration
- Process design to optimize process cycle time
- Adaptation to customers' standards: all brands of robots
- Mechanical engineering: peripheral equipment design
- Automation
- Robotics: definition of trajectory programming to optimize the quality of operations

AN ORGANIZATION DEDICATED TO SUCCESSFUL COMPLETION WORLDWIDE

- R&D service
- Continuous improvement policy
- In-house design and manufacturing skills
- Dedicated project manager and project team
- Locations in Americas, Europe, Japan and China
- International project management capabilities
- Local sourcing
- Local installation at customer's plant
- Customer service supported by a network of subsidiaries worldwide

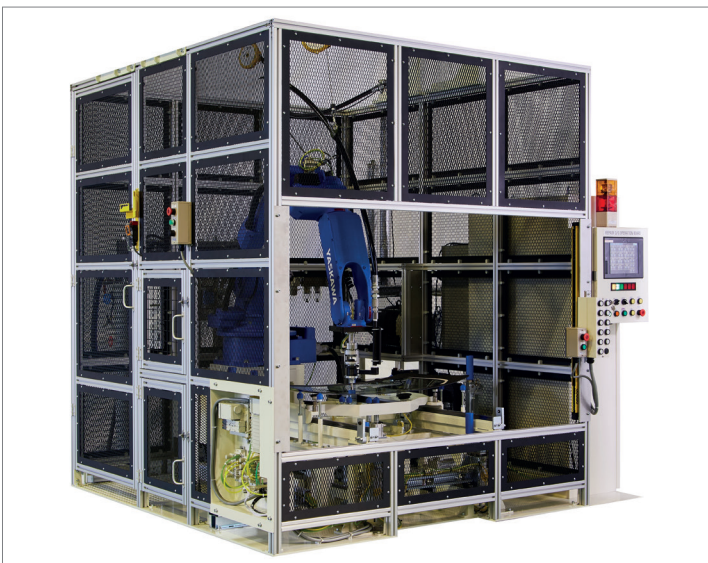

RESEARCH & TESTING CENTER

Thanks to its in-house TechCenter, Fives benefits from process testing facilities to develop technologies that meet customers' standards and requirements, and optimize sealing system performance.

HEALTH/SAFETY/ENVIRONMENT COMMITMENT

Fives is committed to quality control, safety and environmental protection and has implemented a strong HSE policy in all its activities.

Fives also extends its safety management to its sub-contractors to create the appropriate state of mind and practices for safe working conditions.

+200 | Sealing systems successfully integrated

- High level Process Expertise
- Renowned experience since 1958
- Adaptation to customers' standards (all brands of robot)
- Product reliability thanks to a continuous improvement process
