

GENI-Line™ sorter

The linear cross-belt technology

The smart choice for your mid-sized sorting systems

- Fully automated solution
- Simple configuration
- Versatile item handling
- Easy installation and maintenance

The handling solution that blends the simplicity of a linear system with the cross-belt flexibility to handle any item.

The GENI-Line is Fives' linear sorter equipped with driven narrow belts. Replacing the sliding shoe discharge mechanisms, it is ideal solution in applications requiring gentle and accurate sorting for mid-size-throughput warehouses.

Designed for compact spaces and high-density sortation, GENI-Line is the perfect solution for parcel and postal agencies and depots, small 3PLs, and manufacturers handling their own logistics operations.

FULLY AUTOMATED SOLUTION

The GENI-Line is a fully automated solution integrating an automatic items loading from one end. It features high-density chutes, maximizing the number of destinations while minimizing the overall footprint.

VERSATILE ITEMS HANDLING

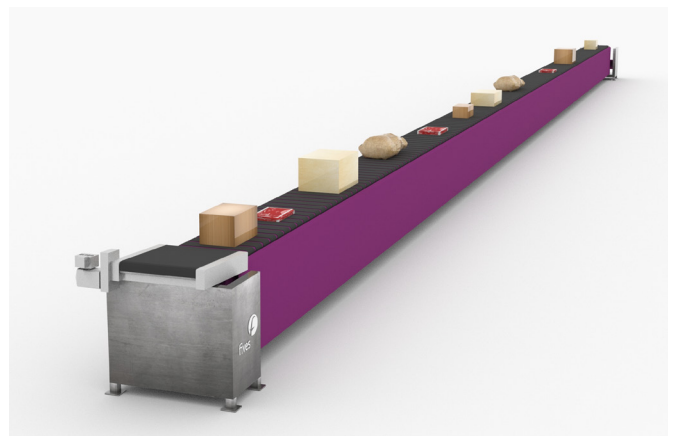

With its driven belt technology, the GENI-Line goes beyond the limits of standard linear sorters handling a wide variety of items, from wrapped apparel and polybags to large plastic bags, with the same efficiency.

SIMPLE CONFIGURATION

The technology features a straightforward design with simple and robust components, making it easy to operate from day one and in everyday use.

EASY INSTALLATION AND MAINTENANCE

Easy to install and simple to maintain, the system ensures maximum uptime and reduced operational effort. Maintenance is fast and intuitive: a driven belt unit module replacement takes few minutes.

Technical features	
Sorter capacity	up to 8,000 items/h
Max. items weight	50 kg
